

Motor Service

The Automotive Service Shop Magazine

1. 10-UP INNER-RING augments pressures to improve sealing efficiency.

2. 10-UP CAST-IRON RING with its gentle mating action of graphitic iron insures immediate seating.

3. 10-UP CHROME PLATED RAIL provides an added barrier against blow-by.

10^{up} demands Advanced Compression Ring Performance, TOO!

QUICKER SEATING . . . LONGER LIFE! You need both today in compression rings as never before. The increased demands for control-of-oil and sealing-against-vacuum again emphasizes the importance to you of Ramco Engineering Leadership. You'll find years-ahead compression ring performance in both Ramco 10-Up Sets for older cars . . . in Ramco C-9 Sets for the newest of engines. Ramsey Corporation, St. Louis 8, Missouri.

Sealed Power Valves meet every replacement need

Whether you're re-valving passenger cars, trucks, busses or tractors, Sealed Power Valves will best meet your replacement requirements. There's a Sealed Power Valve of the right steel and right design for every installation in the complete Sealed Power valve line.

Sealed Power Free Valves often give five times the service of ordinary valves, because rotation ends the main causes of valve burning. And Sealed Power Sodium-Cooled Valves run cooler and last longer in the special situations for which they are designed.
