

## "Snoopy" Survivor / Barn Find Model A Hot Rod

Build was started in 1960 & completed in 1962. Model A body was purchased from a garage in Iron Bridge for \$15, suspension from a 1947 Mercury Car, rebuilt engine from Tech High school, everything else from the wrecking yard & combing peoples back yards (\$10 Grill Shell). It was sold in 1966 to 2nd owner who a couple years later had Riverside motors put up for sale when 3rd owner Matti Petinen acquired in approx. 1968, last plated in 1970 and stored in a garage since then, Matti passed away in 1983, a few years later the car was moved from his parents garage to his widow's garage where it sat undisturbed until Aug 23 2014 when it was purchased, "extracted" & moved to it's new home on St. Joes. I plan to do what's necessary to make it running, reliable & safe - It can only be an original "Survivor" Hot Rod once, there are no plans for restoration, rather preservation - Jeremy Callahan

### Build Credit's

Original Owner / Builder	Martin Oja
Fabrication & Welding	Bob Campbell
Interior	Elizabeth Oja (Martin's Wife)- Done on a Foot Treadle Sewing Machine !
Body & Paint	Ed Luck- Lead Body work & Paint
